

Declaration of Decontamination

More than just pumps

Health and safety regulations oblige all businesses to protect their employees and the environment from harmful effects when handling hazardous substances.

Since you, as the operator of our products, know your specific application best of all and since you are familiar with the handling of your media, we require the following in order to accept return of goods to our premises

- this Declaration of Decontamination, fully completed and signed by an authorized person,
- the Safety Data Sheets describing the media
- and, if applicable, specific Handling Instructions

so that we, for our part, can also protect our employees and operating equipment in the best possible way.

Please upload the documents to request your Return Material Authorisation (RMA) number on our website.

Print out the documents and attach them to the outside of the packaging in a clearly visible position (e.g. in a transparent document sleeve) together with the RMA number.

Radioactive or biologically contaminated products cannot be accepted for return.

*e.g. Electric Motors

More than just pumps

Products that have been contaminated with substances to which at least one of the hazard symbols described above has been assigned can only be accepted

- in a completely emptied and
- decontaminated

condition.

If, despite careful emptying and decontamination, special safety precautions have to be taken when handling the delivered product, please provide respective instructions.
